## e-COLIBRI

Electric drain cleaning

### Urban fitted

**CRIT'Air O - LEZ Access**  
Work in urban areas and in parking garages underground car parks

### Power

From unclogging to cleaning by variation of the HP performance  
Flow / pressure adjustment

### Ergonomy

Possibility of working with continuous filling  
Remote antenna reel  
2 Remote control included

### Safety

Decrease in exposure to noise and nuisances  
Intervention in pedestrian areas

Mounted on Mercedes e-VITO, the **e-COLIBRI** is a 100% electric cleaner (carrier and equipment).

It is specially designed for property maintenance, its small size and technology allows access to restricted areas (dense urban areas, underground parking lots, narrow roads ...) and low emissions.

The different tools installed allow to carry out cleaning, unclogging, descaling or unblocking of networks up to DN 200.

## Technical features

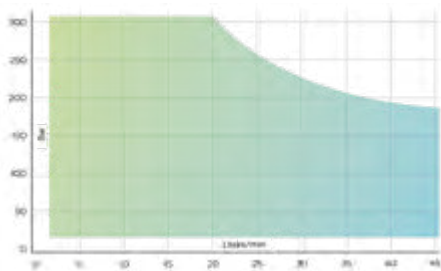

Work zone :  
Cities and LEZ thanks  
to the **CRIT'Air 0** sticker

Composite tank: 400l  
Thanks to the **e-optimium** function,  
put the automation at the service of  
your equipment's consumption.

From unclogging to cleaning by varying  
the HP performance

2 remotes control  
Engine start/stop by  
remote control

Dedicated and secure  
storages

HP reel  
100m 1/2"

MERCEDES **e-VITO**, 116 hp, **CRIT'Air 0**  
Equipment driven by batteries of 7,5  
kWh independent of the batteries and  
the motorization of the carrier

30 min. autonomy on full charge  
Up to 5000 charging cycles  
1 cycle = one full discharge  
**e-optimium** function for consumption  
management

## Options and variants

- LED lighting
- Color rear view camera
- Reel of filling 25m DN 19
- Reel 40m remote antenna

## Real estate maintenance range
