multifunction arms
Flush system for tank cleaning

Design

Customizable space
Plenty of storage space
Large operating volume
Easy maintenance

Safety

Secure installation
Work light + pedestrian lighting
Level & charge indicators

MAX design for operator ergonomics. Equipped with a multifunction arm with vacuum and HP, the EUROPA MAX combination unit has been developed primarily for the safety and productivity of operators working from the rear of the vehicle.

The foldable and telescopic arm is equipped with all the functions necessary for maintenance, cleaning, and pumping of sewer networks. The upper part of the combination unit features a storage cassette for the suction hose.

Technical specifications

EUROPA MAX

Municipal Combination Unit

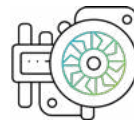

Arm working range: 220°
without hose connection
Multifunction arm + cassette
Suction hose DN 127
length 15m

Maximum water capacity: 5 400 l
Maximum sludge capacity: 9 000 l
Operating volume: 14 400 l

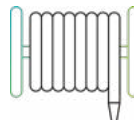

Jetting pump :
240l/min - 190 bar - 125ch

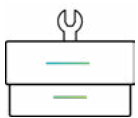

Suction pump :
2 500m³/h free flow

Radio control +
remote control

Main HP reel 200m 1"
Secondary HP reel 100m 1/2"

Pipe box
PPE box
Large storage capacity

26t
